

InvestIQ – ReadMe

Hi,

if you want to start investing and also if you are not sure about how to do that, you are in the right place.

But before starting, there two steps that we have to complete to be able to run the code file, these are:

1-) Installation of the Required Libraries

2-) Installation of the “chromedriver”

1-) List of Required Libraries

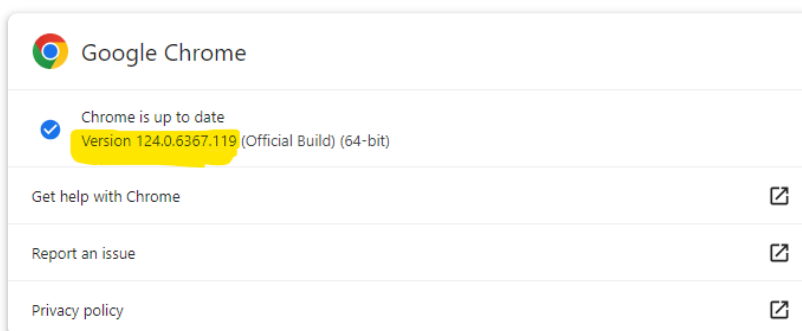

- We need to install some extarnel libraries to be able to run the code file. These libraries are listed below, and you can see the necessary commands to install them via cmd.

Selenium -> **pip install selenium**
Pandas -> **pip install pandas**
Numpy -> **pip install numpy**
Matplotlib -> **pip install matplotlib**

2-) Download the “chromedriver”

- Before donwload the chromedriver there is one thing that you have to learn, version of your chrome browser.
- To learn this, go to this website “chrome://settings/help”
- Then you will see the version number.

About Chrome

- After that, visit this webpage to be able to download the chromedriver which has the same version number as your browser.
- Last, find the correct platform for your computer, copy the link, paste it to the url bar and hit enter.

<https://googlechromelabs.github.io/chrome-for-testing/>

Chrome for Testing availability

This page lists the latest available cross-platform Chrome for Testing versions and assets per Chrome release channel.

Consult [our JSON API endpoints](#) if you're looking to build automated scripts based on Chrome for Testing release data.

Last updated @ 2024-05-06T12:09:58.372Z

Channel	Version	Revision	Status
Stable	124.0.6367.91	r1274542	✓
Stable (upcoming)	124.0.6367.118	r1274542	✗
Beta	125.0.6422.26	r1287751	✓
Dev	126.0.6439.0	r1292160	✓
Dev (upcoming)	126.0.6452.3	r1294836	✗
Canary	126.0.6462.0	r1296672	✓

- If you use chrome browser that has older version than versions which lists in the above page, also try to check this website:

<https://chromedriver.chromium.org/downloads>

Current Releases

- If you are using Chrome version 115 or newer, please consult [the Chrome for Testing availability dash](#) ChromeDriver version downloading.
- For older versions of Chrome, please see below for the version of ChromeDriver that supports it.

For more information on selecting the right version of ChromeDriver, please see the [Version Selection](#) page.

ChromeDriver 114.0.5735.90

Supports Chrome version 114

For more details, please see the [release notes](#).

ChromeDriver 114.0.5735.16

Supports Chrome version 114

For more details, please see the [release notes](#).

ChromeDriver 113.0.5672.63

Supports Chrome version 113

- Resolved issue 4205: Same object ids in Classic and BiDi [Pri-1]
- Resolved issue 4302: Don't assume that Mapper is in the first tab in ExecuteGetWindowHandles [Pri-1]
- Resolved issue 4356: Chrome 110 not utilizing pref value "download.default_directory" [Pri-1]

For more details, please see the [release notes](#).

ChromeDriver 113.0.5672.24

Supports Chrome version 113

- Resolved issue 4205: Same object ids in Classic and BiDi [Pri-1]
- Resolved issue 4302: Don't assume that Mapper is in the first tab in ExecuteGetWindowHandles [Pri-1]

- Then click on the correct platform which is associated with your computer.

- As the last step, unzip the file which has just downloaded, open the folder, copy the chromedriver.exe and paste it into the folder that has the python file which you will work on it.

Note: Of course, you don't have to copy the .exe file into the folder. If you don't realize this process, you will have to give this .exe file's path into the webdriver.Chrome() as parameter but with this way, you don't need to define any path.

And That's it, you are all set and ready to go.
